ICPSR PROCESSING NOTES FOR #36151
India Human Development Survey-II (IHDS-II), 2011-2012

DS1: Individual

1. **Study Documentation:** The relationship between IHDS-II survey questions and dataset variables can be observed in both the questionnaires and the datasets. In the questionnaires, survey questions are listed by question number, with the associated dataset variable name located at the end of the response field. For variables in the datasets, a majority of variable labels feature associated question numbers from the questionnaires. However, a number of discrepancies exist between questions in the survey questionnaires and variables in the datasets. No additional information was provided.

2. **Deleted Variables:** ICPSR has deleted variables **TA7** and **CS14** from the Individual dataset at the request of the P.I.

3. **Truncated Variable Labels:** Several variable labels are truncated in the Stata files due to Stata limitations.

4. **Value Label Correction:** For variables **RO8, RO9**, and **RO10** in the Individual dataset, the value label "IF Spouse / Parent outside for more than 6 months" has been applied to value 69 per P.I. instruction, rather than value 55 as indicated in the Income and Social Capital Questionnaire.

5. **Documentation Discrepancies:** For variable **ED3** in the Individual dataset, ICPSR received the following corrected value labels from the P.I.:

Questionnaire Value Labels	Corrected Dataset Value Labels
No=0	none=0
Yes, fluent=1	little=1
Yes, little=2	fluent=2

   Additionally, education variables (e.g., **ED6, CS6, CS9, HHEDUC, HHEDUCF, HHEDUCM, etc.)** were missing labels for values 13 and 14 in the questionnaires. The P.I. provided labels "1 year post-secondary" and "2 years post-secondary" for values 13 and 14, respectively.

6. **Additional Information:** For additional information on the India Human Development Survey, please visit the India Human Development Survey Web site.

ICPSR 36151

India Human Development Survey-II (IHDS-II), 2011-12

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
